Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2006 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Abutments

Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Acoustic measurement

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Aeration

Bottom Aeration of Stepped Spillways — Michael Pfister, Willi H. Hager, and Hans-Erwin Minor; 132 (8), 850-3 (2006).

Air entrainment

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Air flow

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Air water interactions

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Algorithms

Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).

Alluvial channels

Scale Independent Linear Behavior of Alluvial Channel Flow — He Qing Huang and Howard H. Chang; 132 (7), 722-30 (2006).

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Alluvial streams

Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

Approximation methods

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Aprons

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Aquatic plants

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Asymmetry

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Barriers

Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).

Bed load

Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).

Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Bed materials

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Bedforms

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).

Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Bends, hydraulic

Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).

Bentonite

Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).

Bifurcations

Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Blocks

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Boulders

Flow Resistance of Rock Chutes with Protruding Boulders — Stefano Pagliara and Pietro Chiavaccini; 132 (6), 545-52 (2006).

Boundaries

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Boundary shear

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).

Bridge abutments

Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Bridge design

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Bridge failure

Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62

(2006).

Bridge foundation

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Bridges

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Experimental Investigation of Clear-Water Local Scour at Pile Groups — B. Ataie-Ashtiani and A. A. Beheshti; 132 (10), 1100-4 (2006).

Bridges, piers

Reduction of Local Scour in the Vicinity of Bridge Pier Groups Using Collars and Riprap — A. R. Zarrati, M. Nazariha, and M. B. Mashahir; 132 (2), 154-62 (2006).

Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62 (2006).

Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Buoyant jets

Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).

Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

Calculation

Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Calibration

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Canada

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Case reports

Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Case Study: Dam Safety during Construction, Lessons of the Overtopping Diversion Works at Aguamilpa Dam — H. Marengo; 132 (11), 1121-7 (2006).

Cavitation

Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Channel design

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Channel flow

Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).

Evaluation of the Micromodel: An Extremely Small-Scale Movable Bed Model — Stephen T. Maynord; 132 (4), 343-53 (2006).

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Channel morphology

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Channels

Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Hydraulic Jumps in Sloping Channels: Sequent Depth Ratio — M. K. Beirami and Mohammad R. Chamani; 132 (10), 1061-8 (2006).

Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Clogging

Design of Street Curb Opening Inlets Using a Decay-Based Clogging Factor — James C. Y. Guo; 132 (11), 1237-41 (2006).

Coastal environment

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9 (2006).

Coefficients

Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Cohesionless sediment

Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Cohesive sediment

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Cohesive soils

Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).

Combined sewer overflow

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Composite materials

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Computation

Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Computational fluid dynamics technique
Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).

Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Computer analysis
Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Computer models
Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Computer programming
Optimization of Water Distribution Networks Using Integer Linear Programming — Hossein M. V. Samani and Alireza Mottaghi; 132 (5), 501-9 (2006).

Concentration
Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Concrete
Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Conduits
Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Configuration
Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Conservation
Divergence Form for Bed Slope Source Term in Shallow Water Equations — Alessandro Valiani and Lorenzo Begnudelli; 132 (7), 652-65 (2006).

Contamination
Asymptotic Solutions for One-Dimensional Dispersion in Rivers — Bruce Hunt; 132 (1), 87-93 (2006).

Contraction
Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Critical flow
Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

Culverts
Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

Currents
Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Cylinders
Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Dam failure
Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).

Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).

Damping
Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Dams
Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Case Study: Dam Safety during Construction, Lessons of the Overtopping Diversion Works at Aguamilpa Dam — H. Marengo; 132 (11), 1121-7 (2006).

Earthquake Hydrodynamic Pressure on Dams — Chong-Hung Zee and Raymond Zee; 132 (11), 1128-33 (2006).

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Data analysis
Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Databases
Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Debris
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).

Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Degradation
Disturbance Caused by Bed Sills on the Slopes of Steep Streams — J. P. Martín-Vide and A. Andreatta; 132 (11), 1186-94 (2006).

Density
Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).

Dilution
Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).

Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Disasters
Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).

Discharge measurement
Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

New Method for Estimation of Discharge — Mahmoud F. Maghrebi and James E. Ball; 132 (10), 1044-51 (2006).

Dispersion
Asymptotic Solutions for One-Dimensional Dispersion in Rivers — Bruce Hunt; 132 (1), 87-93 (2006).

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Drag
Probability Density Function of Instantaneous Drag Forces and Shear Stresses on a Bed — Bas Hofland and Jurjen A. Battjes; 132 (11), 1169-75 (2006).

Drainage
Optimal Layout of Sewer Systems: A Deterministic versus a Stochastic Model — A. Freire Diogo and Victor M. Graveto; 132 (9), 927-43 (2006).

Drop structures
Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke

Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Dunes

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Transition from Ripples to Dunes — Arved J. Raudkivi; 132 (12), 1316-20 (2006).

Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Dynamic analysis

Explicit Integration Method for Extended-Period Simulation of Water Distribution Systems — Jakobus E. van Zyl, Dragan A. Savic, and Godfrey A. Walters; 132 (4), 385-92 (2006).

Earthquakes

Earthquake Hydrodynamic Pressure on Dams — Chong-Hung Zee and Raymond Zee; 132 (11), 1128-33 (2006).

Effluents

Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

Embankments

Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).

Energy dissipation

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Innovative Energy-Dissipating Hood — Michael C. Johnson and Rajesh Dham; 132 (8), 759-64 (2006).

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Energy loss

Energy Dissipation on Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (1), 41-8 (2006).

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Engineering education

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Entrainment

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Probability Density Function of Instantaneous Drag Forces and Shear Stresses on a Bed — Bas Hofland and Jurjen A. Battjes; 132 (11), 1169-75 (2006).

Environmental hydraulics

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Erosion

Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Errors

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Estimation

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Estuaries

Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).

Europe

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Experimental data

Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Experimentation

Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).

Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Failures

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Fiber reinforced materials

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Field investigations

Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

Finite element method

Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Fish habitats

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Flood frequency

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Flood plains

Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).

Flood Plain Filling by a Monoclinal Flood Wave — M. L. Shome and P. M. Steffler; 132 (5), 529-32 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Flood routing

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Floods

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Flood Plain Filling by a Monoclinal Flood Wave — M. L. Shome and P. M. Steffler; 132 (5), 529-32 (2006).

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Numerical Calculation of Turbulence Structure in Depth-Varying Unsteady Open-Channel Flows — Iehisa Nezu and Michio Sanjou; 132 (7), 681-95 (2006).

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Flow distribution

Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).

Flow measurement

Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).

Flow patterns

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).

Flow rates

Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).

Flow resistance

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Flow Resistance of Rock Chutes with Protruding Boulders — Stefano Pagliara and Pietro Chiavaccini; 132 (6), 545-52 (2006).

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Flow separation

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Flow simulation

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Fluid dynamics

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Fluid flow

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Fluid mechanics

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Flumes

Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).

Fluvial hydraulics

Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

Forecasting

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Frazil ice

Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).

Frequency response

Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

Friction

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hirotō Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132

(11), 1159-68 (2006).

Frictions

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Froude number

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Fuzzy sets

Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Gates

Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Gaussian process

Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Geographic information systems

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Geometry

Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).

Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Geophysical surveys

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Global positioning

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Gravel

Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Great Lakes

Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).

Grid systems

Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).

Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).

Ground-water flow

Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Hazards

Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Highways

Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

History

Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Hydraulic design

Innovative Energy-Dissipating Hood — Michael C. Johnson and Rajesh Dham; 132 (8), 759-64 (2006).

Hydraulic engineering

Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Hydraulic jets

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Hydraulic jump

Hydraulic Jumps in Sloping Channels: Sequent Depth Ratio — M. K. Beirami and Mohammad R. Chamani; 132 (10), 1061-8 (2006).

Hydraulic jumps

Energy Dissipation on Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (1), 41-8 (2006).

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Hydraulic loads

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Hydraulic models

Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).

Hydraulic networks

Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Hydraulic roughness

Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Hydraulic structures

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Energy Dissipation on Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (1), 41-8 (2006).

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Hydraulics

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Bottom Aeration of Stepped Spillways — Michael Pfister, Willi H. Hager, and Hans-Erwin Minor; 132 (8), 850-3 (2006).

Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9

(2006).

Experimental Study of Surcharged Flow at Combining Sewer Junctions — Can-Hua Zhao, David Z. Zhu, and Nallamuthu Rajaratnam; 132 (12), 1259-71 (2006).

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Hydrodynamic pressure

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Hydrodynamics

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Earthquake Hydrodynamic Pressure on Dams — Chong-Hung Zee and Raymond Zee; 132 (11), 1128-33 (2006).

Hydrographic surveys

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Hydrologic data

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Hydrologic models

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Ice forces

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Ice formation

Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Ice jams

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Ice sheets

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Imaging techniques

Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

In situ tests

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

India

Life of Maithon Reservoir on Ground of Sedimentation: Case Study in India — Dipankar Chaudhuri; 132 (9), 875-80 (2006).

Industrial wastes

Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).

Infrastructure

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Inlets, waterways

Design of Street Curb Opening Inlets Using a Decay-Based Clogging Factor — James C. Y. Guo; 132 (11), 1237-41 (2006).

Instrumentation

Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Intakes

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).

Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).

Internal waves

Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Islands

Limitations of Depth-Averaged Modeling for Shallow Wakes — Peter K. Stansby; 132 (7), 737-40 (2006).

Japan

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

Jet in crossflow

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Jets

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Joints

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Kinematic wave theory

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Laboratory tests

Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).

Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).

Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Landslides

One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Leakage

Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Linings

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Louisiana

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Manholes

Experimental Study of Surcharged Flow at Combining Sewer Junctions — Can-Hua Zhao, David Z. Zhu, and Nallamuthu Rajaratnam; 132 (12), 1259-71 (2006).

Mapping

Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Mass

Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin

C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Mass transfer

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Mathematical models

Asymptotic Solutions for One-Dimensional Dispersion in Rivers — Bruce Hunt; 132 (1), 87-93 (2006).

Earthquake Hydrodynamic Pressure on Dams — Chong-Hung Zee and Raymond Zee; 132 (11), 1128-33 (2006).

Mathematics

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Meandering streams

Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Measurement

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Measuring instruments

Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Mechanics

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Mesh generation

Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).

Mexico

Case Study: Dam Safety during Construction, Lessons of the Overtopping Diversion Works at Aguamilpa Dam — H. Marengo; 132 (11), 1121-7 (2006).

Mixing

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Mixing and transport

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Model studies

Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).

Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Models

Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).

Monte Carlo method

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Mountain streams

New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Multiport diffuser

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Municipal engineering

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Nearshore

Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).

Netherlands

Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Neural networks

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Nonuniform flow

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

North Carolina

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Numerical analysis

Numerical Calculation of Turbulence Structure in Depth-Varying Unsteady Open-Channel Flows — Iehisa Nezu and Michio Sanjou; 132 (7), 681-95 (2006).

Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Numerical model

Rate of Deposition of Fine Sediment from Suspension — David Pritchard; 132 (5), 533-6 (2006).

Numerical models

Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).

One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Oceans

Marine Wastewater Discharges from Multiport Dif-

fusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Odors

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

One-dimensional models

Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Open channel flow

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).

Classifying River Waves by the Saint Venant Equations Decoupled in the Laplacian Frequency Domain — Weihao Chung and Yi-Lung Kang; 132 (7), 666-80 (2006).

Numerical Calculation of Turbulence Structure in Depth-Varying Unsteady Open-Channel Flows — Iehisa Nezu and Michio Sanjou; 132 (7), 681-95 (2006).

Scale Independent Linear Behavior of Alluvial Channel Flow — He Qing Huang and Howard H. Chang; 132 (7), 722-30 (2006).

Multilayer Averaged and Moment Equations for One-Dimensional Open-Channel Flows — Cenling Xia and Yee-Chung Jin; 132 (8), 839-49 (2006).

Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

New Method for Estimation of Discharge — Mahmoud F. Maghrebi and James E. Ball; 132 (10), 1044-51 (2006).

Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Open channels

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Optimization

Optimization of Water Distribution Networks Using Integer Linear Programming — Hossein M. V. Samani and Alireza Mottaghi; 132 (5), 501-9 (2006).

Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).

Oscillatory flow

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Outfall sewers

Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).

Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Overflow

Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Experimental Study and 3D Numerical Simulations for a Free-Overflow Spillway — Bijan Dargahi; 132 (9), 899-907 (2006).

Overland flow

Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).

Parameters

Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Transition from Ripples to Dunes — Arved J. Raudkivi; 132 (12), 1316-20 (2006).

Particle size

Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).

Particle size distribution

Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).

Performance characteristics

Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

Permeability

Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Physical properties

Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).

Piers

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Pile groups

Experimental Investigation of Clear-Water Local Scour at Pile Groups — B. Ataie-Ashtiani and A. A. Beheshti; 132 (10), 1100-4 (2006).

Piles

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Pipe flow

Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).

Pipe networks
Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Pipelines
Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Pipes
Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Plumes
Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Pools
Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Porosity
Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).

Porous media
Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Predictions
Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Rate of Deposition of Fine Sediment from Suspension — David Pritchard; 132 (5), 533-6 (2006).

Probabilistic methods
Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Probability density functions
Probability Density Function of Instantaneous Drag Forces and Shear Stresses on a Bed — Bas Hofland and Jurjen A. Battjes; 132 (11), 1169-75 (2006).

Probability distribution
Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Public safety
Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Pumps
Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).

Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).

Radar
Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Rainfall
ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Ramps
Energy Dissipation on Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (1), 41-8 (2006).

Flow Resistance of Rock Chutes with Protruding Boulders — Stefano Pagliara and Pietro Chiavaccini; 132 (6), 545-52 (2006).

Regression analysis
Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Regression models
Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Reinforced
Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Research
Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Reservoir operation
Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Reservoirs
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Life of Maithon Reservoir on Ground of Sedimentation: Case Study in India — Dipankar Chaudhuri; 132 (9), 875-80 (2006).

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

Resonance
Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Revetments
Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Reynolds number
Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Riprap
Reduction of Local Scour in the Vicinity of Bridge Pier Groups Using Collars and Riprap — A. R. Zarrati, M. Nazariha, and M. B. Mashahir; 132 (2), 154-62 (2006).

Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62 (2006).

Risk management
Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).

Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).

Case Study: Dam Safety during Construction, Lessons of the Overtopping Diversion Works at Aguamilpa Dam — H. Marengo; 132 (11), 1121-7 (2006).

River beds
Evaluation of the Micromodel: An Extremely Small-Scale Movable Bed Model — Stephen T. Maynord; 132 (4), 343-53 (2006).

Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).

River flow
Asymptotic Solutions for One-Dimensional Dispersion in Rivers — Bruce Hunt; 132 (1), 87-93 (2006).

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

RiverSpill: A National Application for Drinking

Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Rivers

Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Experimental Investigation of Clear-Water Local Scour at Pile Groups — B. Ataie-Ashtiani and A. A. Beheshti; 132 (10), 1100-4 (2006).

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).

Rocks

Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).

Roughness

Flood Plain Filling by a Monoclinal Flood Wave — M. L. Shome and P. M. Steffler; 132 (5), 529-32 (2006).

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Routing

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Runoff

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Salt water intrusion

Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).

Sand

Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Scale models

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Evaluation of the Micromodel: An Extremely Small-Scale Movable Bed Model — Stephen T. Maynord; 132 (4), 343-53 (2006).

Scour

Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Reduction of Local Scour in the Vicinity of Bridge Pier Groups Using Collars and Riprap — A. R. Zarrati, M. Nazariha, and M. B. Mashahir; 132 (2), 154-62 (2006).

Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62 (2006).

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).

Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller; 132 (7), 635-42 (2006).

Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Experimental Investigation of Clear-Water Local Scour at Pile Groups — B. Ataie-Ashtiani and A. A. Beheshti; 132 (10), 1100-4 (2006).

Disturbance Caused by Bed Sills on the Slopes of Steep Streams — J. P. Martín-Vide and A. Andreatta; 132 (11), 1186-94 (2006).

Secondary flow

Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Sediment

Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Evaluation of the Micromodel: An Extremely Small-Scale Movable Bed Model — Stephen T. Maynord; 132 (4), 343-53 (2006).

Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).

Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Sediment concentration

Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Sediment deposits

Rate of Deposition of Fine Sediment from Suspension — David Pritchard; 132 (5), 533-6 (2006).

Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).

Sediment load

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Sediment transport

Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Scale Independent Linear Behavior of Alluvial Channel Flow — He Qing Huang and Howard H. Chang; 132 (7), 722-30 (2006).

Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9 (2006).

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Sedimentation

Life of Maithon Reservoir on Ground of Sedimentation: Case Study in India — Dipankar Chaudhuri; 132 (9), 875-80 (2006).

Sensitivity analysis

Multilayer Averaged and Moment Equations for One-Dimensional Open-Channel Flows — Cenling Xia and Yee-Chung Jin; 132 (8), 839-49 (2006).

Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).

Sensors

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Settling velocity

Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).

Sewage

Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).

Sewer pipes

Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).

Sewers

Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).

Optimal Layout of Sewer Systems: A Deterministic versus a Stochastic Model — A. Freire Diogo and Victor M. Graveto; 132 (9), 927-43 (2006).

Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).

Shafts

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Shallow water

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).

One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Divergence Form for Bed Slope Source Term in Shallow Water Equations — Alessandro Valiani and Lorenzo Begnudelli; 132 (7), 652-65 (2006).

Limitations of Depth-Averaged Modeling for Shallow Wakes — Peter K. Stansby; 132 (7), 737-40 (2006).

Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Shape

Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).

Shear stress

Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9 (2006).

Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Probability Density Function of Instantaneous Drag Forces and Shear Stresses on a Bed — Bas Hofland and Jurjen A. Battjes; 132 (11), 1169-75 (2006).

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Sheet flow

Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Shock waves

Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Simulation

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

3D Simulation of Combining Flows in 90° Rectan-

gular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).

Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Multilayer Averaged and Moment Equations for One-Dimensional Open-Channel Flows — Cenling Xia and Yee-Chung Jin; 132 (8), 839-49 (2006).

Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

Experimental Study and 3D Numerical Simulations for a Free-Overflow Spillway — Bijan Dargahi; 132 (9), 899-907 (2006).

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Simulation models

Explicit Integration Method for Extended-Period Simulation of Water Distribution Systems — Jakobus E. van Zyl, Dragan A. Savic, and Godfrey A. Walters; 132 (4), 385-92 (2006).

Slabs

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Slopes

Flow Resistance of Rock Chutes with Protruding Boulders — Stefano Pagliara and Pietro Chiavaccini; 132 (6), 545-52 (2006).

Divergence Form for Bed Slope Source Term in Shallow Water Equations — Alessandro Valiani and Lorenzo Begnudelli; 132 (7), 652-65 (2006).

Hydraulic Jumps in Sloping Channels: Sequent Depth Ratio — M. K. Beirami and Mohammad R. Chamani; 132 (10), 1061-8 (2006).

Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).

Disturbance Caused by Bed Sills on the Slopes of Steep Streams — J. P. Martín-Vide and A. Andreatta; 132 (11), 1186-94 (2006).

Solids flow

Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Solutes

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Spectra

Classifying River Waves by the Saint Venant Equations Decoupled in the Laplacian Frequency Domain — Weihao Chung and Yi-Lung Kang; 132 (7), 666-80 (2006).

Spills

Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Spillways

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Bottom Aeration of Stepped Spillways — Michael Pfister, Willi H. Hager, and Hans-Erwin Minor; 132 (8), 850-3 (2006).

Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).

Experimental Study and 3D Numerical Simulations for a Free-Overflow Spillway — Bijan Dargahi; 132 (9), 899-907 (2006).

Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Statistics

Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).

Steady flow

Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Steel

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Stochastic models

Optimal Layout of Sewer Systems: A Deterministic versus a Stochastic Model — A. Freire Diogo and Victor M. Graveto; 132 (9), 927-43 (2006).

Stochastic processes

Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).

Stormwater management

Design of Street Curb Opening Inlets Using a Decay-Based Clogging Factor — James C. Y. Guo; 132 (11), 1237-41 (2006).

Stream channels

Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Stream gaging

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Streams

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Disturbance Caused by Bed Sills on the Slopes of Steep Streams — J. P. Martín-Vide and A. Andreatta; 132 (11), 1186-94 (2006).

Streets

Design of Street Curb Opening Inlets Using a Decay-Based Clogging Factor — James C. Y. Guo; 132 (11), 1237-41 (2006).

Structural safety

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Subcritical flow

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Submerged flow
Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Submerged jets
Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Supercritical flow
Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Surcharge
Experimental Study of Surcharged Flow at Combining Sewer Junctions — Can-Hua Zhao, David Z. Zhu, and Nallamuthu Rajaratnam; 132 (12), 1259-71 (2006).

Surface jets
Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Surface waters
One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Surface waves
One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Suspended load
Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

Suspended sediment
Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Suspended sediments
Rate of Deposition of Fine Sediment from Suspension — David Pritchard; 132 (5), 533-6 (2006).

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Tailwater
Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Taiwan
Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Thermal powerplants
Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Three-dimensional flow
Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Three-dimensional models
Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).

Experimental Study and 3D Numerical Simulations for a Free-Overflow Spillway — Bijan Dargahi; 132 (9), 899-907 (2006).

Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Tidal effects
Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Topography
Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).

Divergence Form for Bed Slope Source Term in Shallow Water Equations — Alessandro Valiani and Lorenzo Begnudelli; 132 (7), 652-65 (2006).

Tracers
Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Transcritical flow
Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).

Transient flow
Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).

Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).

Transients
Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Tsunamis
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Turbulence
Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Numerical Calculation of Turbulence Structure in Depth-Varying Unsteady Open-Channel Flows — Iehisa Nezu and Michio Sanjou; 132 (7), 681-95 (2006).

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Turbulent flow
Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Turbulent flows
Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Two-dimensional analysis
Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Two-dimensional models
Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Limitations of Depth-Averaged Modeling for Shallow Wakes — Peter K. Stansby; 132 (7), 737-40 (2006).

Two-phase flow
Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Typhoons
Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Ultrasonic methods
Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Underwater structures
Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Uniform flow
Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).

Unsteady flow
Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Urban areas
Optimal Layout of Sewer Systems: A Deterministic versus a Stochastic Model — A. Freire Diogo and Victor M. Graveto; 132 (9), 927-43 (2006).

Validation
Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).

Valves
Innovative Energy-Dissipating Hood — Michael C. Johnson and Rajesh Dham; 132 (8), 759-64 (2006).

Vector analysis
Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Vegetation
Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Velocity
Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).

Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Rate of Deposition of Fine Sediment from Suspension — David Pritchard; 132 (5), 533-6 (2006).

Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).

New Method for Estimation of Discharge — Mahmoud F. Maghrebi and James E. Ball; 132 (10), 1044-51 (2006).

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Velocity profile
Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Multilayer Averaged and Moment Equations for One-Dimensional Open-Channel Flows — Cenling Xia and Yee-Chung Jin; 132 (8), 839-49 (2006).

Ventilation
Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Vortex shedding
Limitations of Depth-Averaged Modeling for Shallow Wakes — Peter K. Stansby; 132 (7), 737-40 (2006).

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Vortices
Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Walls
Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Washington
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).

Waste disposal
Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).

Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Waste management
Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Wastewater
Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).

Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).

Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Water discharge
Evaluation of the Micromodel: An Extremely Small-Scale Movable Bed Model — Stephen T. Maynord; 132 (4), 343-53 (2006).

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Water distribution
Explicit Integration Method for Extended-Period Simulation of Water Distribution Systems — Jakobus E. van Zyl, Dragan A. Savic, and Godfrey A. Walters; 132 (4), 385-92 (2006).

Water distribution systems
Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Optimization of Water Distribution Networks Using Integer Linear Programming — Hossein M. V. Samani and Alireza Mottaghi; 132 (5), 501-9 (2006).

Water flow
Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62 (2006).

Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).

Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).

Transition from Ripples to Dunes — Arved J. Raudkivi; 132 (12), 1316-20 (2006).

Water hammer

Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Water levels

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Water pipelines

Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).

Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

Optimization of Water Distribution Networks Using Integer Linear Programming — Hossein M. V. Samani and Alireza Mottaghi; 132 (5), 501-9 (2006).

Water pollution

Asymptotic Solutions for One-Dimensional Dispersion in Rivers — Bruce Hunt; 132 (1), 87-93 (2006).

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Water quality

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Water resources

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Water supply

Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).

Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Water waves

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Wave crest

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Wave measurement

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Wave overtopping

Case Study: Dam Safety during Construction, Lessons of the Overtopping Diversion Works at Aguamilpa Dam — H. Marengo; 132 (11), 1121-7 (2006).

Wave propagation

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Classifying River Waves by the Saint Venant Equations Decoupled in the Laplacian Frequency Domain — Weihao Chung and Yi-Lung Kang; 132 (7), 666-80 (2006).

Wave velocity

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Wavelength

Transition from Ripples to Dunes — Arved J. Raudkivi; 132 (12), 1316-20 (2006).

Waves

Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).

Flood Plain Filling by a Monoclinal Flood Wave — M. L. Shome and P. M. Steffler; 132 (5), 529-32 (2006).

Weirs

Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Author Index

Abad, Jorge D.
Discussion of "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — Jorge D. Abad and Marcelo H. García; 132 (3), 332-4 (2006).

Aberle, J.
Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Abreau, José
Discussion of "Recirculating Flow in Oscillatory U-Tubes" by Jason L. Miller and David E. Werth — Enrique Cabrera, José Abreau, Enrique Cabrera Jr., and Jorge García-Serra; 132 (11), 1242-4 (2006).

Abt, Steven R.
Closure to "Measurement of Coarse Gravel and Cobble Transport Using Portable Bedload Traps" by Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan — Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan; 132 (2), 222-4 (2006).

Ahmad, M. S. S.
Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Ali, M. S.
Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Almedeij, Jaber H.
Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Alonso, Carlos
Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Al-Ruwaih, Fawzia
Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).

Altan-Sakarya, A. Burcu
Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Altunkaynak, Abdüsselam
Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Amstutz, David E.
RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Andreatta, A.
Disturbance Caused by Bed Sills on the Slopes of Steep Streams — J. P. Martín-Vide and A. Andreatta; 132 (11), 1186-94 (2006).

Anohin, Vadim V.
Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Ataie-Ashtiani, B.
Experimental Investigation of Clear-Water Local Scour at Pile Groups — B. Ataie-Ashtiani and A. A. Beheshti; 132 (10), 1100-4 (2006).

Attal, Mikaël
New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Aydin, Ismail
Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).

Baddour, R. E.
Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Baek, Kyong Oh
Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Bahadur, Rakesh
RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Balachandar, Ram
Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Ball, James E.
New Method for Estimation of Discharge — Mahmoud F. Maghrebi and James E. Ball; 132 (10), 1044-51 (2006).

Barkdoll, Brian D.
Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).
Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).
Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).
Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).

Bates, P. D.
Closure to "Open Channel Flow through Different Forms of Submerged Flexible Vegetation" by C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen — C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen; 132 (7), 750 (2006).

Battjes, Jurjen A.
Probability Density Function of Instantaneous Drag Forces and Shear Stresses on a Bed — Bas Hofland and Jurjen A. Battjes; 132 (11), 1169-75 (2006).

Baylar, Ahmet
Closure to "Influence of Included Angle and Sill Slope on Air Entrainment of Triangular Planform Labyrinth Weirs" by M. Emin Emiroglu and Ahmet Baylar — M. Emin Emiroglu and Ahmet Baylar; 132 (7), 748 (2006).

Bayram, Atilla
Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Begnudelli, Lorenzo
Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).
Divergence Form for Bed Slope Source Term in Shallow Water Equations — Alessandro Valiani and Lorenzo Begnudelli; 132 (7), 652-65 (2006).

Beheshti, A. A.
Experimental Investigation of Clear-Water Local Scour at Pile Groups — B. Ataie-Ashtiani and A. A. Beheshti; 132 (10), 1100-4 (2006).

Beirami, M. K.
Hydraulic Jumps in Sloping Channels: Sequent Depth Ratio — M. K. Beirami and Mohammad R. Chamani; 132 (10), 1061-8 (2006).

Beltaos, Spyros
Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Bergant, Anton
Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).
Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Berger, R. C.
Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Boreel, Gerard L.
Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).
Bouchart, F. J.-C.
Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).
Bousmar, D.
Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).
Brandimarte, Luigia
Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).
Briaud, Jean-Louis
Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).
Brown, Jim
Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).
Bui, Tai
Discussion of "Analytical Solutions for Estimating Effective Discharge" by Peter Goodwin — Asif Quader, Yiping Guo, and Tai Bui; 132 (1), 112-3 (2006).
Bunte, Kristin
Closure to "Measurement of Coarse Gravel and Cobble Transport Using Portable Bedload Traps" by Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan — Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan; 132 (2), 222-4 (2006).
Burrell, Brian C.
Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).
Cabrera, Enrique, Jr.
Discussion of "Recirculating Flow in Oscillatory U-Tubes" by Jason L. Miller and David E. Werth — Enrique Cabrera, José Abreau, Enrique Cabrera Jr., and Jorge García-Seira; 132 (11), 1242-4 (2006).
Camenen, Benoît
Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).
Cameron, Shara
Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).
Campbell, Lorna
Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).
Cao, Zhixian
Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9 (2006).
Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).
Cardoso, António Heleno
Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).
Četina, Matjaž
Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).
Chamani, Mohammad R.
Hydraulic Jumps in Sloping Channels: Sequent Depth Ratio — M. K. Beirami and Mohammad R. Chamani; 132 (10), 1061-8 (2006).
Chan, C. H. C.
Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).
Chang, Chia-Jung
Discussion of "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — Chyan-Deng Jan, Chia-Jung Chang, and Ming-Hsi Lee; 132 (8), 868-71 (2006).
Chang, Howard H.
Scale Independent Linear Behavior of Alluvial Channel Flow — He Qing Huang and Howard H. Chang; 132 (7), 722-30 (2006).
Chanson, H.
Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).
Discussion of "Discharge through a Permeable Rubble Mound Weir" by Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda — H. Chanson; 132 (4), 432-3 (2006).
Discussion of "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — C. A. Gonzalez and H. Chanson; 132 (5), 537-9 (2006).
Charbeneau, Randall J.
Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).
Chaudhry, M. H.
Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).
Chaudhuri, Dipankar
Life of Maithon Reservoir on Ground of Sedimentation: Case Study in India — Dipankar Chaudhuri; 132 (9), 875-80 (2006).
Chen, Tsung-Hsien
Discussion of "Simulation of Flow and Mass Dispersion in Meandering Channels" by Jennifer G. Duan — Chyan-Deng Jan, Ji-Shang Wang, and Tsung-Hsien Chen; 132 (3), 339-41 (2006).
Chen, Yunliang
Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).
Chiavaccini, Pietro
Energy Dissipation on Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (1), 41-8 (2006).
Flow Resistance of Rock Chutes with Protruding Boulders — Stefano Pagliara and Pietro Chiavaccini; 132 (6), 545-52 (2006).
Chung, Weihao
Classifying River Waves by the Saint Venant Equations Decoupled in the Laplacian Frequency Domain — Weihao Chung and Yi-Lung Kang; 132 (7), 666-80 (2006).
Chyan, Yuh-Ju
Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).
Clark, Shawn
Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).
Clemens, François H. L. R.
Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).
Cokgor, Sevket
Discussion of "Open Channel Flow through Different Forms of Submerged Flexible Vegetation" by C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen — Serhat Kucukali and Sevket Cokgor; 132 (7), 748-9 (2006).
Coleman, Stephen
Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).
Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).
Constantinescu, S. G.
Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).
Coussot, P.
Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).
Cruise, J. F.
Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).
Cuthbertson, Alan J. S.
Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).
Daly, Steven F.
Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).

Dargahi, Bijan
Experimental Study and 3D Numerical Simulations for a Free-Overflow Spillway — Bijan Dargahi; 132 (9), 899-907 (2006).
da Silva, Ana Maria Ferreira
Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).
Davidson, J. W.
Adjusting Nodal Demands in SCADA Constrained Real-Time Water Distribution Network Models — J. W. Davidson and F. J.-C. Bouchart; 132 (1), 102-10 (2006).
Daviero, Gregory J.
Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).
Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).
Davies, Peter A.
Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).
Deigaard, Rolf
Breaking Antidunes: Cyclic Behavior due to Hysteresis — Rolf Deigaard; 132 (6), 620-3 (2006).
Delleur, Jacques W.
Book Reviews — Jacques W. Delleur; 132 (3), 328-9 (2006).
Dey, Subhasish
Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).
Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).
Closure to "Time Variation of Scour at Abutments" by Subhasish Dey and Abdul Karim Barbhuiya — Subhasish Dey; 132 (5), 543 (2006).
Dham, Rajesh
Innovative Energy-Dissipating Hood — Michael C. Johnson and Rajesh Dham; 132 (8), 759-64 (2006).
Ding, Yan
Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).
Diogo, A. Freire
Optimal Layout of Sewer Systems: A Deterministic versus a Stochastic Model — A. Freire Diogo and Victor M. Graveto; 132 (9), 927-43 (2006).
Diplas, Panayiotis
Approach to Separate Sand from Gravel for Bed-Load Transport Calculations in Streams with Bimodal Sediment — Jaber H. Almedeij, Panayiotis Diplas, and Fawzia Al-Ruwaih; 132 (11), 1176-85 (2006).
D'Odorico, Paolo
Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).
Doering, Jay
Laboratory Experiments on Frazil-Size Characteristics in a Counterrotating Flume — Shawn Clark and Jay Doering; 132 (1), 94-101 (2006).
Dogrul, Emin C.
Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).
Duan, Jennifer G.
Closure to "Simulation of Flow and Mass Dispersion in Meandering Channels" by Jennifer G. Duan — Jennifer G. Duan; 132 (3), 341-2 (2006).
Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).
Edwini-Bonsu, S.
Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).
Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).
El-Tahawy, Tarek
Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).
Emiroglu, M. Emin
Closure to "Influence of Included Angle and Sill Slope on Air Entrainment of Triangular Planform Labyrinth Weirs" by M. Emin Emiroglu and Ahmet Baylar — M. Emin Emiroglu and Ahmet Baylar; 132 (7), 748 (2006).
Ettema, Robert
Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).
Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).
Hans Albert Einstein in South Carolina — Robert Ettema and Cornelia F. Mutel; 132 (8), 754-8 (2006).
Frazil Ice Blockage of Water Intakes in the Great Lakes — Steven F. Daly and Robert Ettema; 132 (8), 814-24 (2006).
Hunter Rouse—His Work in Retrospect — Robert Ettema; 132 (12), 1248-58 (2006).
Falcon, Marco A.
Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).
Fang, Hongwei
Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).
Fang, Shenguang
Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).
Faruque, M. A. A.
Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).
Ferreira, Rui Miguel Lage
Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).
Fredsøe, Jørgen
Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).
French, Richard
Lodging Velocity for an Emergent Aquatic Plant in Open Channels — Jennifer G. Duan, Brian Barkdoll, and Richard French; 132 (10), 1015-20 (2006).
Fu, Jin-Cheng
Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).
Fukuchi, Tsugio
Hydraulic Elements Chart for Pipe Flow Using New Definition of Hydraulic Radius — Tsugio Fukuchi; 132 (9), 990-4 (2006).
Furusawa, Takaaki
Closure to "Discharge through a Permeable Rubble Mound Weir" by Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda — Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda; 132 (4), 433-4 (2006).
García, Marcelo H.
Discussion of "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — Jorge D. Abad and Marcelo H. García; 132 (3), 332-4 (2006).
Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).
García-Navarro, P.
One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).
García-Serra, Jorge
Discussion of "Recirculating Flow in Oscillatory U-Tubes" by Jason L. Miller and David E. Werth — Enrique Cabrera, José Abreau, Enrique Cabrera Jr., and Jorge García-Serra; 132 (11), 1242-4 (2006).
Ger, A. Metin
Performance of Slit Weir — Ismail Aydin, A. Burcu Altan-Sakarya, and A. Metin Ger; 132 (9), 987-9 (2006).
Ghani, A. Ab
Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).
Ghidaoui, Mohamed S.
Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).

Gonzalez, C. A.

Discussion of "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — C. A. Gonzalez and H. Chanson; 132 (5), 537-9 (2006).

Goodwin, Peter

Closure to "Analytical Solutions for Estimating Effective Discharge" by Peter Goodwin — Peter Goodwin; 132 (1), 114-5 (2006).

Goudar, Chetan T.

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Graber, S. David

Asymmetric Flow in Symmetric Supercritical Expansions — S. David Graber; 132 (2), 207-13 (2006).

Graveto, Victor M.

Optimal Layout of Sewer Systems: A Deterministic versus a Stochastic Model — A. Freire Diogo and Victor M. Graveto; 132 (9), 927-43 (2006).

Greimann, Blair

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Guganesharajah, K.

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Gulliver, J. S.

Closure to "Decay of Turbulence Downstream of a Stilling Basin" by A. L. Urban, S. C. Wilhelms, and J. S. Gulliver — A. L. Urban, S. C. Wilhelms, and J. S. Gulliver; 132 (12), 1362 (2006).

Guo, James C. Y.

Design of Street Curb Opening Inlets Using a Decay-Based Clogging Factor — James C. Y. Guo; 132 (11), 1237-41 (2006).

Guo, Junke

Closure to "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — Junke Guo and Pierre Y. Julien; 132 (3), 337-9 (2006).

Closure to "Shear Stress in Smooth Rectangular Open-Channel Flows" by Junke Guo and Pierre Y. Julien — Junke Guo and Pierre Y. Julien; 132 (6), 631-2 (2006).

Guo, Yakun

Model Study of the Influence of Submerged Tidal Barriers on Estuarine Mixing and Exchange Processes — Alan J. S. Cuthbertson, Peter A. Davies, and Yakun Guo; 132 (10), 1033-43 (2006).

Guo, Yiping

Discussion of "Analytical Solutions for Estimating Effective Discharge" by Peter Goodwin — Asif Quader, Yiping Guo, and Tai Bui; 132 (1), 112-3 (2006).

Habib, Emad H.

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Hager, Willi H.

Book Reviews — Willi Hager; 132 (2), 219-20 (2006).

Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62 (2006).

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Bottom Aeration of Stepped Spillways — Michael Pfister, Willi H. Hager, and Hans-Erwin Minor; 132 (8), 850-3 (2006).

Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Closure to "Further Results to Time-Dependent Local Scour at Bridge Elements" by Giuseppe Oliveto and Willi H. Hager — Giuseppe Oliveto and Willi H. Hager; 132 (9), 997-8 (2006).

Closure to "Ski Jump Hydraulics" by Valentin Heller, Willi H. Hager, and Hans-Erwin Minor — Valentin Heller, Willi H. Hager, and Hans-Erwin Minor; 132 (10), 1117 (2006).

Haneda, Masanori

Closure to "Discharge through a Permeable Rubble Mound Weir" by Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda — Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda; 132 (4), 433-4 (2006).

He, Cheng

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

He, Zaicheng

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Heller, Valentin

Closure to "Ski Jump Hydraulics" by Valentin Heller, Willi H. Hager, and Hans-Erwin Minor — Valentin Heller, Willi H. Hager, and Hans-Erwin Minor; 132 (10), 1117 (2006).

Henderson, Andrew D.

Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

Hesselink, Annika W.

Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Hill, D. F.

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

Ho, Yao-Hsien

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Hofland, Bas

Probability Density Function of Instantaneous Drag Forces and Shear Stresses on a Bed — Bas Hofland and Jurjen A. Battjes; 132 (11), 1169-75 (2006).

Hojnik, Tomaž

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Hsu, Ming-Hsi

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Hsu, Shaohua Marko

Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Hu, X. G.

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Huai, Wenxin

Numerical Simulation of Obstructed Round Buoyant Jets in a Static Uniform Ambient — Wenxin Huai and Shenguang Fang; 132 (4), 428-31 (2006).

Huang, Bingbin

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Huang, He Qing

Scale Independent Linear Behavior of Alluvial Channel Flow — He Qing Huang and Howard H. Chang; 132 (7), 722-30 (2006).

Huang, Jianchun

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Hunt, Bruce

Asymptotic Solutions for One-Dimensional Dispersion in Rivers — Bruce Hunt; 132 (1), 87-93 (2006).

Imberger, Jörg

Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Ingle, R. N.

Discussion of "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — S. V. Sakhalkar, S. P. Tatewar, and R. N. Ingle; 132 (5), 539-40 (2006).

Ishikawa, Tadaharu

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

Islam, G. M. Tarekul

Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Ivey, Gregory N.
Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Jan, Chyan-Deng
Discussion of "Simulation of Flow and Mass Dispersion in Meandering Channels" by Jennifer G. Duan — Chyan-Deng Jan, Ji-Shang Wang, and Tsung-Hsien Chen; 132 (3), 339-41 (2006).
Discussion of "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — Chyan-Deng Jan, Chia-Jung Chang, and Ming-Hsi Lee; 132 (8), 868-71 (2006).

Jarny, S.
Dam Break Wave of Thixotropic Fluid — H. Chanson, S. Jarny, and P. Coussot; 132 (3), 280-93 (2006).

Jeong, Seong Jin
Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Jin, Yee-Chung
Multilayer Averaged and Moment Equations for One-Dimensional Open-Channel Flows — Cenling Xia and Yee-Chung Jin; 132 (8), 839-49 (2006).

Johnson, Michael C.
Innovative Energy-Dissipating Hood — Michael C. Johnson and Rajesh Dham; 132 (8), 759-64 (2006).
Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Julien, Pierre Y.
Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).
Closure to "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — Junke Guo and Pierre Y. Julien; 132 (3), 337-9 (2006).
Closure to "Shear Stress in Smooth Rectangular Open-Channel Flows" by Junke Guo and Pierre Y. Julien — Junke Guo and Pierre Y. Julien; 132 (6), 631-2 (2006).
— Pierre Julien; 132 (6), 633 (2006).
Book Reviews — Pierre Julien; 132 (10), 1118 (2006).
Book Reviews — Pierre Julien; 132 (9), 1001 (2006).
Book Reviews — Pierre Julien; 132 (11), 1245 (2006).
Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien; 132 (12), 1347-52 (2006).
Book Reviews — Pierre Julien; 132 (12), 1363 (2006).

Kabir, M. R.
Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Kadir, Tariq N.
Flow Computation and Mass Balance in Galerkin Finite-Element Groundwater Models — Emin C. Dogrul and Tariq N. Kadir; 132 (11), 1206-14 (2006).

Kang, Yi-Lung
Classifying River Waves by the Saint Venant Equations Decoupled in the Laplacian Frequency Domain — Weihao Chung and Yi-Lung Kang; 132 (7), 666-80 (2006).

Kassem, A. A.
Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

Kawamura, Ikuo
Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Khan, Abdul A.
Discussion of "Time Variation of Scour at Abutments" by Subhasish Dey and Abdul Karim Barbhuiya — Abdul A. Khan; 132 (5), 542-3 (2006).

Khan, Liaqat A.
Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).

Khatsuria, R. M.
Discussion of "Ski Jump Hydraulics" by Valentin Heller, Willi H. Hager, and Hans-Erwin Minor — R. M. Khatsuria; 132 (10), 1115-6 (2006).
Discussion of "Decay of Turbulence Downstream of a Stilling Basin" by A. L. Urban, S. C. Wilhelms, and J. S. Gulliver — R. M. Khatsuria; 132 (12), 1361 (2006).

Kirkil, Gokhan
Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Kleinhans, Maarten G.
Historic Discharge Measurements in Three Rhine Branches — Annika W. Hesselink, Maarten G. Kleinhans, and Gerard L. Boreel; 132 (2), 140-5 (2006).

Knight, Donald W.
Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Kolyshkin, A. A.
Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Korving, Hans
Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).

Kramer, Kristian
Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Krishnappan, Bommanna G.
Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Krüger, Susanne
Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Krzyk, Mario
Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Kubo, Naritaka
Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Kucukali, Serhat
Discussion of "Open Channel Flow through Different Forms of Submerged Flexible Vegetation" by C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen — Serhat Kucukali and Sevket Cokgor; 132 (7), 748-9 (2006).

Kuhnle, Roger A.
Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).
Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).

Lam, K. M.
Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

Lambert, Martin
Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).
Book Reviews — Martin Lambert; 132 (4), 435-6 (2006).
Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Larson, Magnus
Equivalent Roughness Height for Plane Bed under Steady Flow — Benoît Camenen, Atilla Bayram, and Magnus Larson; 132 (11), 1146-58 (2006).

Lavé, Jérôme
New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Leal, João Gouveia Aparício Bento
Dam-Break Wave-Front Celerity — João Gouveia Aparício Bento Leal, Rui Miguel Lage Ferreira, and António Heleno Cardoso; 132 (1), 69-76 (2006).

Lee, J. H. W.
Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

Lee, Jong-Seok
Electromagnetic Wave Surface Velocimetry — Jong-Seok Lee and Pierre Y. Julien; 132 (2), 146-53 (2006).
Downstream Hydraulic Geometry of Alluvial Channels — Jong-Seok Lee and Pierre Y. Julien;

132 (12), 1347-52 (2006).

Lee, Joseph H. W.

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Lee, Kwan Tun

Bridge Blockage and Overbank Flow Simulations Using HEC–RAS in the Keelung River during the 2001 Nari Typhoon — Kwan Tun Lee, Yao-Hsien Ho, and Yuh-Ju Chyan; 132 (3), 319-23 (2006).

Lee, Ming-Hsi

Discussion of "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — Chyan-Deng Jan, Chia-Jung Chang, and Ming-Hsi Lee; 132 (8), 868-71 (2006).

Lee, W. Y.

Global Behaviors of a Round Buoyant Jet in a Counterflow — K. M. Lam, W. Y. Lee, C. H. C. Chan, and J. H. W. Lee; 132 (6), 589-604 (2006).

Lennon, J. M.

Particle Image Velocity Measurements of Undular and Hydraulic Jumps — J. M. Lennon and D. F. Hill; 132 (12), 1283-94 (2006).

León, Arturo S.

Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).

Leslie, Della

Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Li, Hua

Parallel Walls as an Abutment Scour Countermeasure — Hua Li, Brian D. Barkdoll, Roger Kuhnle, and Carlos Alonso; 132 (5), 510-20 (2006).

Lim, Siow-Yong

Discussion of "Shear Stress in Smooth Rectangular Open-Channel Flows" by Junke Guo and Pierre Y. Julien — Shu-Qing Yang and Siow-Yong Lim; 132 (6), 629-31 (2006).

Lin, Ching-Long

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Liu, Bin

Diagonal Cartesian Method for the Numerical Simulation of Flow and Suspended Sediment Transport over Complex Boundaries — Hongwei Fang, Bin Liu, and Bingbin Huang; 132 (11), 1195-205 (2006).

Liu, Minnan

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Liu, Wen-Cheng

Dynamic Routing Model with Real-Time Roughness Updating for Flood Forecasting — Ming-Hsi Hsu, Jin-Cheng Fu, and Wen-Cheng Liu; 132 (6), 605-19 (2006).

Liu, Zhi-Ping

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Lloyd, B. J.

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

López, Guillermo

Discussion of "Further Results to Time-Dependent Local Scour at Bridge Elements" by Giuseppe Oliveto and Willi H. Hager — Guillermo López, Luis Teixeira, Miguel Ortega-Sánchez, and Gonzalo Simarro; 132 (9), 995-6 (2006).

López, J. G.

Closure to "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — J. Martínez, J. Reca, M. T. Morillas, and J. G. López; 132 (8), 871-2 (2006).

Lyn, Dennis A.

The Idea of a Hydraulic Engineering Journal — Dennis A. Lyn; 132 (5), 439 (2006).

Some Recent Additions to the Editorial Board — Dennis A. Lyn; 132 (8), 753 (2006).

2006—Year of Continuity and Momentum — Dennis A. Lyn; 132 (12), 1247 (2006).

Lyons, D. J.

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Maeno, Shiro

Closure to "Discharge through a Permeable Rubble Mound Weir" by Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda — Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda; 132 (4), 433-4 (2006).

Maghrebi, Mahmoud F.

New Method for Estimation of Discharge — Mahmoud F. Maghrebi and James E. Ball; 132 (10), 1044-51 (2006).

Manes, Costantino

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Marengo, H.

Case Study: Dam Safety during Construction, Lessons of the Overtopping Diversion Works at Aguamilpa Dam — H. Marengo; 132 (11), 1121-7 (2006).

Marion, Andrea

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Marsalek, Jiri

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Martínez, J.

Closure to "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — J. Martínez, J. Reca, M. T. Morillas, and J. G. López; 132 (8), 871-2 (2006).

Martinuzzi, R.

Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Martín-Vide, J. P.

Disturbance Caused by Bed Sills on the Slopes of Steep Streams — J. P. Martín-Vide and A. Andreatta; 132 (11), 1186-94 (2006).

Mashahir, M. B.

Reduction of Local Scour in the Vicinity of Bridge Pier Groups Using Collars and Riprap — A. R. Zarrati, M. Nazariha, and M. B. Mashahir; 132 (2), 154-62 (2006).

Masson, Jean-Paul

New Facility to Study River Abrasion Processes — Mikaël Attal, Jérôme Lavé, and Jean-Paul Masson; 132 (6), 624-8 (2006).

Mathioudakis, K.

Book Reviews — K. Mathioudakis; 132 (7), 751 (2006).

Maynord, Stephen T.

Evaluation of the Micromodel: An Extremely Small-Scale Movable Bed Model — Stephen T. Maynord; 132 (4), 343-53 (2006).

McEwan, Ian

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Melo, J. F.

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Melville, Bruce

Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).

Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).

Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).

Meng, Jian

Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Meselhe, Ehab A.

Stage–Discharge Relations for Low-Gradient Tidal Streams Using Data-Driven Models — Emad H. Habib and Ehab A. Meselhe; 132 (5), 482-92 (2006).

Michell, Frank

Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Michioku, Kohji

Closure to "Discharge through a Permeable Rubble Mound Weir" by Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda — Kohji Michioku, Shiro Maeno, Takaaki Furusawa, and Masanori Haneda; 132 (4), 433-4 (2006).

Mikoš, Matjaž

Case Study: Numerical Simulations of Debris Flow

below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Miller, Lindon

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Miller, William, Jr.

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller Jr.; 132 (7), 635-42 (2006).

Minor, Hans-Erwin

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Bottom Aeration of Stepped Spillways — Michael Pfister, Willi H. Hager, and Hans-Erwin Minor; 132 (8), 850-3 (2006).

Development of Air Concentration on Chute Spillways — Kristian Kramer, Willi H. Hager, and Hans-Erwin Minor; 132 (9), 908-15 (2006).

Closure to "Ski Jump Hydraulics" by Valentin Heller, Willi H. Hager, and Hans-Erwin Minor — Valentin Heller, Willi H. Hager, and Hans-Erwin Minor; 132 (10), 1117 (2006).

Mohapatra, P. K.

Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

Moloo, J.

Detection of Partial Blockage in Single Pipelines — P. K. Mohapatra, M. H. Chaudhry, A. A. Kassem, and J. Moloo; 132 (2), 200-6 (2006).

Momber, A. W.

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Montanari, Alberto

Stochastic Flow Analysis for Predicting River Scour of Cohesive Soils — Luigia Brandimarte, Alberto Montanari, Jean-Louis Briaud, and Paolo D'Odorico; 132 (5), 493-500 (2006).

Morel, R.

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Morillas, M. T.

Closure to "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — J. Martínez, J. Reca, M. T. Morillas, and J. G. López; 132 (8), 871-2 (2006).

Mottaghi, Alireza

Optimization of Water Distribution Networks Using Integer Linear Programming — Hossein M. V. Samani and Alireza Mottaghi; 132 (5), 501-9 (2006).

Musleh, F. A.

Functional Relationships of Resistance in Wide Flood Plains with Rigid Unsubmerged Vegetation — F. A. Musleh and J. F. Cruise; 132 (2), 163-71 (2006).

Muste, Marian

Similitude of Large-Scale Turbulence in Experiments on Local Scour at Cylinders — Robert Ettema, Gokhan Kirkil, and Marian Muste; 132 (1), 33-40 (2006).

Case Study: Sediment Control at Water Intake for Large Thermal-Power Station on a Small River — Frank Michell, Robert Ettema, and Marian Muste; 132 (5), 440-9 (2006).

Mutel, Cornelia F.

Hans Albert Einstein in South Carolina — Robert Ettema and Cornelia F. Mutel; 132 (8), 754-8 (2006).

Nazariha, M.

Reduction of Local Scour in the Vicinity of Bridge Pier Groups Using Collars and Riprap — A. R. Zarrati, M. Nazariha, and M. B. Mashahir; 132 (2), 154-62 (2006).

Nezu, Iehisa

Numerical Calculation of Turbulence Structure in Depth-Varying Unsteady Open-Channel Flows — Iehisa Nezu and Michio Sanjou; 132 (7), 681-95 (2006).

Nguyen, Dan K.

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Nguyen, The Hung

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Nikora, Vladimir

Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Nishat, Ainun

Nodal Point Relation for the Distribution of Sediments at Channel Bifurcation — G. M. Tarekul Islam, M. R. Kabir, and Ainun Nishat; 132 (10), 1105-9 (2006).

Nixon, W.

Range of Validity of the Transient Damping Leakage Detection Method — W. Nixon, M. S. Ghidaoui, and A. A. Kolyshkin; 132 (9), 944-57 (2006).

Novak, Pavel

Discussion of "Measurement of Coarse Gravel and Cobble Transport Using Portable Bedload Traps" by Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan — Pavel Novak; 132 (2), 222 (2006).

Discussion of "Ski Jump Hydraulics" by Valentin Heller, Willi H. Hager, and Hans-Erwin Minor — Pavel Novak; 132 (10), 1116 (2006).

Odai, Samuel Nii

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Ohtsu, Iwao

Closure to "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — Iwao Ohtsu, Youichi Yasuda, and Masayuki Takahashi; 132 (5), 540-2 (2006).

Oliveto, Giuseppe

Closure to "Further Results to Time-Dependent Local Scour at Bridge Elements" by Giuseppe Oliveto and Willi H. Hager — Giuseppe Oliveto and Willi H. Hager; 132 (9), 997-8 (2006).

Onizuka, Kotaro

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Ortega-Sánchez, Miguel

Discussion of "Further Results to Time-Dependent Local Scour at Bridge Elements" by Giuseppe Oliveto and Willi H. Hager — Guillermo López, Luis Teixeira, Miguel Ortega-Sánchez, and Gonzalo Simarro; 132 (9), 995-6 (2006).

Osato, Koji

Analytical Solution of the Burgers Equation for Simulating Translatory Waves in Conveyance Channels — Samuel Nii Odai, Naritaka Kubo, Kotaro Onizuka, and Koji Osato; 132 (2), 194-9 (2006).

Özger, Mehmet

Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).

Pagliara, Stefano

Energy Dissipation on Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (1), 41-8 (2006).

Hydraulics of Plane Plunge Pool Scour — Stefano Pagliara, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 450-61 (2006).

Flow Resistance of Rock Chutes with Protruding Boulders — Stefano Pagliara and Pietro Chiavaccini; 132 (6), 545-52 (2006).

Paquier, A.

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Parker, Gary

Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).

Parsons, S. B.

Influence of Uncertainties in the Estimation Procedure of Floodwater Level — K. Guganesharajah, D. J. Lyons, S. B. Parsons, and B. J. Lloyd; 132 (10), 1052-60 (2006).

Patel, Virendra C.

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Peirson, William L.

Design of Rock Protection to Prevent Erosion by Water Flows Down Steep Slopes — William L. Peirson and Shara Cameron; 132 (10), 1110-4 (2006).

Peña, E.

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Pender, Gareth

Explicit Formulation of the Shields Diagram for Incipient Motion of Sediment — Zhixian Cao, Gareth Pender, and Jian Meng; 132 (10), 1097-9 (2006).

Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).

Pérez, G.

One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).

Pfister, Michael

Bottom Aeration of Stepped Spillways — Michael Pfister, Willi H. Hager, and Hans-Erwin Minor; 132 (8), 850-3 (2006).

Pickus, Jonathan M.

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Pinheiro, A. N.

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Pinzen, A. Batemann

Closure to "Open Channel Flow through Different Forms of Submerged Flexible Vegetation" by C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen — C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen; 132 (7), 750 (2006).

Pokrajac, Dubravka

Application of UVP within Porous Beds — Costantino Manes, Dubravka Pokrajac, Ian McEwan, Vladimir Nikora, and Lorna Campbell; 132 (9), 983-6 (2006).

Potyondy, John P.

Closure to "Measurement of Coarse Gravel and Cobble Transport Using Portable Bedload Traps" by Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan — Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan; 132 (2), 222-4 (2006).

Pritchard, David

Rate of Deposition of Fine Sediment from Suspension — David Pritchard; 132 (5), 533-6 (2006).

Proust, S.

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Pruden, Amy

Book Reviews — Amy Pruden; 132 (1), 116-7 (2006).

Puertas, J.

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Qu, Junying

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Quader, Asif

Discussion of "Analytical Solutions for Estimating Effective Discharge" by Peter Goodwin — Asif Quader, Yiping Guo, and Tai Bui; 132 (1), 112-3 (2006).

Rabuñal, J.

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Rainville, Francois

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Rajar, Rudi

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Rajaratnam, Nallamuthu

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Book Reviews — N. Rajaratnam; 132 (8), 873 (2006).

Experimental Study of Surcharged Flow at Combining Sewer Junctions — Can-Hua Zhao, David Z. Zhu, and Nallamuthu Rajaratnam; 132 (12), 1259-71 (2006).

Ramamurthy, A. S.

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Ramos, C. M.

Forces on Plunge Pool Slabs: Influence of Joints Location and Width — J. F. Melo, A. N. Pinheiro, and C. M. Ramos; 132 (1), 49-60 (2006).

Randle, Timothy

Movement of Finite Amplitude Sediment Accumulations — Blair Greimann, Timothy Randle, and Jianchun Huang; 132 (7), 731-6 (2006).

Rao, P. Rama Mohan

Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Raudkivi, Arved J.

Transition from Ripples to Dunes — Arved J. Raudkivi; 132 (12), 1316-20 (2006).

Reca, J.

Closure to "Design and Calibration of a Compound Sharp-Crested Weir" by J. Martínez, J. Reca, M. T. Morillas, and J. G. López — J. Martínez, J. Reca, M. T. Morillas, and J. G. López; 132 (8), 871-2 (2006).

Reddy, N. Bhanu Prakasham

Effect of Convergence on Nonlinear Flow in Porous Media — N. Bhanu Prakasham Reddy and P. Rama Mohan Rao; 132 (4), 420-7 (2006).

Rennie, Colin D.

Case Study of Precision of GPS Differential Correction Strategies: Influence on aDcp Velocity and Discharge Estimates — Colin D. Rennie and Francois Rainville; 132 (3), 225-34 (2006).

Rivière, N.

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Roberts, Philip J. W.

Marine Wastewater Discharges from Multiport Diffusers. III: Stratified Stationary Water — Gregory J. Daviero and Philip J. W. Roberts; 132 (4), 404-10 (2006).

Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).

Rochfort, Quintin

Case Study: Refinement of Hydraulic Operation of a Complex CSO Storage/Treatment Facility by Numerical and Physical Modeling — Cheng He, Jiri Marsalek, Quintin Rochfort, and Bommanna G. Krishnappan; 132 (2), 131-9 (2006).

Roe, Philip L.

Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).

Roland, A.

Discussion of "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — A. Roland and U. Zanke; 132 (3), 334-6 (2006).

Romero, José R.

Effect of Long Internal Waves on the Quality of Water Withdrawn from a Stratified Reservoir — Vadim V. Anohin, Jörg Imberger, José R. Romero, and Gregory N. Ivey; 132 (11), 1134-45 (2006).

Rutschmann, Peter

Modeling 3D Supercritical Flow with Extended Shallow-Water Approach — Susanne Krüger and Peter Rutschmann; 132 (9), 916-26 (2006).

Ryan, Sandra E.

Closure to "Measurement of Coarse Gravel and Cobble Transport Using Portable Bedload Traps" by Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan — Kristin Bunte, Steven R. Abt, John P. Potyondy, and Sandra E. Ryan; 132 (2), 222-4 (2006).

Sakhalkar, S. V.

Discussion of "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — S. V. Sakhalkar, S. P. Tatewar, and R. N. Ingle; 132 (5), 539-40 (2006).

Samani, Hossein M. V.

Optimization of Water Distribution Networks Using Integer Linear Programming — Hossein M. V. Samani and Alireza Mottaghi; 132 (5), 501-9 (2006).

Samuels, William B.

RiverSpill: A National Application for Drinking Water Protection — William B. Samuels, David E. Amstutz, Rakesh Bahadur, and Jonathan M. Pickus; 132 (4), 393-403 (2006).

Sana, Ahmad

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Sánchez-Tembleque, F.

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Sanders, Brett F.

Unstructured Grid Finite-Volume Algorithm for Shallow-Water Flow and Scalar Transport with Wetting and Drying — Lorenzo Begnudelli and Brett F. Sanders; 132 (4), 371-84 (2006).

Sanjou, Michio

Numerical Calculation of Turbulence Structure in Depth-Varying Unsteady Open-Channel Flows

— Iehisa Nezu and Michio Sanjou; 132 (7), 681-95 (2006).

Sarathi, Partha

Clear Water Local Scour by Submerged Three-Dimensional Wall Jets: Effect of Tailwater Depth — M. A. A. Faruque, Partha Sarathi, and Ram Balachandar; 132 (6), 575-80 (2006).

Sarkar, Arindam

Scour Downstream of an Apron Due to Submerged Horizontal Jets — Subhasish Dey and Arindam Sarkar; 132 (3), 246-57 (2006).

Sarmiento, Oscar A.

Critical Bed Shear Stress for Unisize Sediment — Oscar A. Sarmiento and Marco A. Falcon; 132 (2), 172-9 (2006).

Savage, Bruce M.

Physical and Numerical Comparison of Flow over Ogee Spillway in the Presence of Tailwater — Michael C. Johnson and Bruce M. Savage; 132 (12), 1353-7 (2006).

Savic, Dragan A.

Explicit Integration Method for Extended-Period Simulation of Water Distribution Systems — Jakobus E. van Zyl, Dragan A. Savic, and Godfrey A. Walters; 132 (4), 385-92 (2006).

Schmidt, Arthur R.

Godunov-Type Solutions for Transient Flows in Sewers — Arturo S. León, Mohamed S. Ghidaoui, Arthur R. Schmidt, and Marcelo H. García; 132 (8), 800-13 (2006).

Seo, Il Won

Evaluation of Dispersion Coefficients in Meandering Channels from Transient Tracer Tests — Kyong Oh Baek, Il Won Seo, and Seong Jin Jeong; 132 (10), 1021-32 (2006).

Shen, Jinyin

Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).

Sheppard, D. Max

Live-Bed Local Pier Scour Experiments — D. Max Sheppard and William Miller Jr.; 132 (7), 635-42 (2006).

Sherman, Lee C.

Hydraulic Performance Curves for Highway Culverts — Randall J. Charbeneau, Andrew D. Henderson, and Lee C. Sherman; 132 (5), 474-81 (2006).

Shi, Yu-E

2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).

Shieh, Chjeng-Lun

Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).

Shimada, Masashi

Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).

Shome, M. L.

Flood Plain Filling by a Monoclinal Flood Wave — M. L. Shome and P. M. Steffler; 132 (5), 529-32 (2006).

Simarro, Gonzalo

Discussion of "Further Results to Time-Dependent Local Scour at Bridge Elements" by Giuseppe Oliveto and Willi H. Hager — Guillermo López, Luis Teixeira, Miguel Ortega-Sánchez, and Gonzalo Simarro; 132 (9), 995-6 (2006).

Simpson, Angus R.

Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Singh, Vijay P.

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Sinnakaudan, S. K.

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Sixto, E.

Bat Echolocation Interfering with Ultrasonic Sensors — J. Puertas, E. Peña, F. Sánchez-Tembleque, J. Rabuñal, and E. Sixto; 132 (12), 1358-60 (2006).

Sonnad, Jagadeesh R.

Turbulent Flow Friction Factor Calculation Using a Mathematically Exact Alternative to the Colebrook–White Equation — Jagadeesh R. Sonnad and Chetan T. Goudar; 132 (8), 863-7 (2006).

Srivastava, Rajesh

Discussion of "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — Rajesh Srivastava; 132 (3), 336-7 (2006).

Stansby, Peter K.

Limitations of Depth-Averaged Modeling for Shallow Wakes — Peter K. Stansby; 132 (7), 737-40 (2006).

Steffler, P. M.

Flood Plain Filling by a Monoclinal Flood Wave — M. L. Shome and P. M. Steffler; 132 (5), 529-32 (2006).

Modeling Ventilation Phenomenon in Sanitary Sewer Systems: A System Theoretic Approach — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 778-90 (2006).

Dynamics of Air Flow in Sewer Conduit Headspace — S. Edwini-Bonsu and P. M. Steffler; 132 (8), 791-9 (2006).

Stephens, Mark

Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).

Stockstill, Richard L.

Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Stoesser, T.

Closure to "Open Channel Flow through Different Forms of Submerged Flexible Vegetation" by C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen — C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen; 132 (7), 750 (2006).

Street, Robert L.

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Sturm, Terry W.

Scour around Bankline and Setback Abutments in Compound Channels — Terry W. Sturm; 132 (1), 21-32 (2006).

Sullivan, David

Formation of Breakup Ice Jams at Bridges — Spyros Beltaos, Lindon Miller, Brian C. Burrell, and David Sullivan; 132 (11), 1229-36 (2006).

Sumer, B. Mutlu

Control of Scour at Vertical Circular Piles under Waves and Current — Subhasish Dey, B. Mutlu Sumer, and Jørgen Fredsøe; 132 (3), 270-9 (2006).

Sun, Shuang-Ke

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Takahashi, Masayuki

Closure to "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — Iwao Ohtsu, Youichi Yasuda, and Masayuki Takahashi; 132 (5), 540-2 (2006).

Tanaka, Hitoshi

Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hiroto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Tang, Xiaonan

Sediment Transport in River Models with Overbank Flows — Xiaonan Tang and Donald W. Knight; 132 (1), 77-86 (2006).

Tape, William D.

Variation of Flow Pattern with Sinuosity in Sine-Generated Meandering Streams — Ana Maria Ferreira da Silva, Tarek El-Tahawy, and William D. Tape; 132 (10), 1003-14 (2006).

Tate, Jennifer N.

Refinement Indicator for Mesh Adaption in Shallow-Water Modeling — Jennifer N. Tate, R. C. Berger, and Richard L. Stockstill; 132 (8), 854-7 (2006).

Tatewar, S. P.

Discussion of "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — S. V. Sakhalkar, S. P. Tatewar, and R. N. Ingle; 132 (5), 539-40 (2006).

Tayfur, Gokmen

ANN and Fuzzy Logic Models for Simulating Event-Based Rainfall-Runoff — Gokmen Tayfur and Vijay P. Singh; 132 (12), 1321-30 (2006).

Teixeira, E. C.

Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).

Teixeira, Luis
Discussion of "Further Results to Time-Dependent Local Scour at Bridge Elements" by Giuseppe Oliveto and Willi H. Hager — Guillermo López, Luis Teixeira, Miguel Ortega-Sánchez, and Gonzalo Simarro; 132 (9), 995-6 (2006).
Tian, Xiaodong
Marine Wastewater Discharges from Multiport Diffusers. IV: Stratified Flowing Water — Xiaodong Tian, Philip J. W. Roberts, and Gregory J. Daviero; 132 (4), 411-9 (2006).
Tokyay, T. E.
Validation of a Large-Eddy Simulation Model to Simulate Flow in Pump Intakes of Realistic Geometry — T. E. Tokyay and S. G. Constantinescu; 132 (12), 1303-15 (2006).
Tsai, Yuan-Fan
Three-Dimensional Topography of Debris-Flow Fan — Yuan-Fan Tsai; 132 (3), 307-18 (2006).
Tseng, Chih-Ming
Formation Processes and Configuration of Channel-Flow Dominated Alluvial Deltas by Numerical Simulation — Chih-Ming Tseng, Shaohua Marko Hsu, and Chjeng-Lun Shieh; 132 (8), 825-38 (2006).
Umeda, Makoto
Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).
Unger, Jens
Riprap Failure at Circular Bridge Piers — Jens Unger and Willi H. Hager; 132 (4), 354-62 (2006).
Urban, A. L.
Closure to "Decay of Turbulence Downstream of a Stilling Basin" by A. L. Urban, S. C. Wilhelms, and J. S. Gulliver — A. L. Urban, S. C. Wilhelms, and J. S. Gulliver; 132 (12), 1362 (2006).
Uyumaz, Ali
Fuzzy Logic Model for Equilibrium Scour Downstream of a Dam's Vertical Gate — Ali Uyumaz, Abdüsselam Altunkaynak, and Mehmet Özger; 132 (10), 1069-75 (2006).
Valiani, Alessandro
Divergence Form for Bed Slope Source Term in Shallow Water Equations — Alessandro Valiani and Lorenzo Begnudelli; 132 (7), 652-65 (2006).
van Ballegooy, Rick
Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).
van Ballegooy, Sjoerd
Countermeasure Toe Protection at Spill-Through Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (3), 235-45 (2006).
Flow-Induced Failure of Cable-Tied Blocks — Bruce Melville, Rick van Ballegooy, and Sjoerd van Ballegooy; 132 (3), 324-7 (2006).
Scour Countermeasures for Wing-Wall Abutments — Bruce Melville, Sjoerd van Ballegooy, Stephen Coleman, and Brian Barkdoll; 132 (6), 563-74 (2006).
van Noortwijk, Jan M.
Statistical Modeling of the Serviceability of Sewage Pumps — Hans Korving, François H. L. R. Clemens, and Jan M. van Noortwijk; 132 (10), 1076-85 (2006).
van Zyl, Jakobus E.
Explicit Integration Method for Extended-Period Simulation of Water Distribution Systems — Jakobus E. van Zyl, Dragan A. Savic, and Godfrey A. Walters; 132 (4), 385-92 (2006).
Vardy, Alan
Time-Line Interpolation Errors in Pipe Networks — Masashi Shimada, Jim Brown, Della Leslie, and Alan Vardy; 132 (3), 294-306 (2006).
Vasconcelos, Jose G.
Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).
Vázquez-Cendón, M. E.
One-Dimensional Model of Shallow Water Surface Waves Generated by Landslides — G. Pérez, P. García-Navarro, and M. E. Vázquez-Cendón; 132 (5), 462-73 (2006).
Vítkovský, John P.
Systematic Evaluation of One-Dimensional Unsteady Friction Models in Simple Pipelines — John P. Vítkovský, Anton Bergant, Angus R. Simpson, and Martin F. Lambert; 132 (7), 696-708 (2006).
Numerical Error in Weighting Function-Based Unsteady Friction Models for Pipe Transients — John Vítkovský, Mark Stephens, Anton Bergant, Angus Simpson, and Martin Lambert; 132 (7), 709-21 (2006).
Walder, Joseph S.
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).
Wallis, Steve
Flow Resistance and Momentum Flux in Compound Open Channels — Zhixian Cao, Jian Meng, Gareth Pender, and Steve Wallis; 132 (12), 1272-82 (2006).
Walters, Godfrey A.
Explicit Integration Method for Extended-Period Simulation of Water Distribution Systems — Jakobus E. van Zyl, Dragan A. Savic, and Godfrey A. Walters; 132 (4), 385-92 (2006).
Walters, R.
Data Interpretation for In Situ Measurements of Cohesive Sediment Erosion — J. Aberle, V. Nikora, and R. Walters; 132 (6), 581-8 (2006).
Wang, Ji-Shang
Discussion of "Simulation of Flow and Mass Dispersion in Meandering Channels" by Jennifer G. Duan — Chyan-Deng Jan, Ji-Shang Wang, and Tsung-Hsien Chen; 132 (3), 339-41 (2006).
Wang, Sam S. Y.
2D Shallow-Water Model Using Unstructured Finite-Volumes Methods — Dan K. Nguyen, Yu-E Shi, Sam S. Y. Wang, and The Hung Nguyen; 132 (3), 258-69 (2006).
Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).
Optimal Control of Open-Channel Flow Using Adjoint Sensitivity Analysis — Yan Ding and Sam S. Y. Wang; 132 (11), 1215-28 (2006).
Watts, Philip
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).
Waythomas, Christopher F.
Case Study: Mapping Tsunami Hazards Associated with Debris Flow into a Reservoir — Joseph S. Walder, Philip Watts, and Christopher F. Waythomas; 132 (1), 1-11 (2006).
Weidong, Huang
Discussion of "Influence of Included Angle and Sill Slope on Air Entrainment of Triangular Planform Labyrinth Weirs" by M. Emin Emiroglu and Ahmet Baylar — Huang Weidong; 132 (7), 747-8 (2006).
Wicklein, Edward A.
Validation of a Three-Dimensional Computational Fluid Dynamics Model of a Contact Tank — Liaqat A. Khan, Edward A. Wicklein, and E. C. Teixeira; 132 (7), 741-6 (2006).
Wilhelms, S. C.
Closure to "Decay of Turbulence Downstream of a Stilling Basin" by A. L. Urban, S. C. Wilhelms, and J. S. Gulliver — A. L. Urban, S. C. Wilhelms, and J. S. Gulliver; 132 (12), 1362 (2006).
Wilson, C. A. M. E.
Closure to "Open Channel Flow through Different Forms of Submerged Flexible Vegetation" by C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen — C. A. M. E. Wilson, T. Stoesser, P. D. Bates, and A. Batemann Pinzen; 132 (7), 750 (2006).
Wong, Miguel
Reanalysis and Correction of Bed-Load Relation of Meyer-Peter and Müller Using Their Own Database — Miguel Wong and Gary Parker; 132 (11), 1159-68 (2006).
Wren, D. G.
Lateral Variations in Suspended Sediment Concentration over Dunes — R. A. Kuhnle and D. G. Wren; 132 (12), 1341-6 (2006).
Wright, Steven J.
Improved Simulation of Flow Regime Transition in Sewers: Two-Component Pressure Approach — Jose G. Vasconcelos, Steven J. Wright, and Philip L. Roe; 132 (6), 553-62 (2006).
Wu, Chao
Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).
Wu, Jin
Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).
Wu, Weiming
Formulas for Sediment Porosity and Settling Velocity — Weiming Wu and Sam S. Y. Wang; 132 (8), 858-62 (2006).
Xia, Cenling
Multilayer Averaged and Moment Equations for One-Dimensional Open-Channel Flows — Cenling Xia and Yee-Chung Jin; 132 (8), 839-49 (2006).
Xu, Xingxin
Case Study: Application of GPR to Detection of Hidden Dangers to Underwater Hydraulic Structures — Xingxin Xu, Jin Wu, Jinyin Shen, and Zaicheng He; 132 (1), 12-20 (2006).
Yamaji, Hiroto
Hydrodynamic Behavior of Asymmetric Oscillatory Boundary Layers at Low Reynolds Numbers — Ahmad Sana, Hitoshi Tanaka, Hi-

roto Yamaji, and Ikuo Kawamura; 132 (10), 1086-96 (2006).

Yang, Shu-Qing

Discussion of "Shear Stress in Smooth Rectangular Open-Channel Flows" by Junke Guo and Pierre Y. Julien — Shu-Qing Yang and Siow-Yong Lim; 132 (6), 629-31 (2006).

Yasuda, Youichi

Closure to "Flow Characteristics of Skimming Flows in Stepped Channels" by I. Ohtsu, Y. Yasuda, and M. Takahashi — Iwao Ohtsu, Youichi Yasuda, and Masayuki Takahashi; 132 (5), 540-2 (2006).

Ye, Mao

Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).

Yin, Y.

Erosive Wear of Hydraulic Concrete with Low Steel Fiber Content — X. G. Hu, A. W. Momber, and Y. Yin; 132 (12), 1331-40 (2006).

Yokoyama, Katsuhide

Observation and Simulation of Floodwater Intrusion and Sedimentation in the Shichikashuku Reservoir — Makoto Umeda, Katsuhide Yokoyama, and Tadaharu Ishikawa; 132 (9), 881-91 (2006).

You, Zai-Jin

Discussion of "Initiation of Movement of Quartz Particles" by Wilbert Lick, Lijun Jin, and Joe Gailani — Zai-Jin You; 132 (1), 111-2 (2006).

Yu, Daeyoung

Multiple Tandem Jets in Cross-Flow — Daeyoung Yu, M. S. Ali, and Joseph H. W. Lee; 132 (9), 971-82 (2006).

Yue, Wusi

Large-Eddy Simulation of Turbulent Flow over a Fixed Two-Dimensional Dune — Wusi Yue, Ching-Long Lin, and Virendra C. Patel; 132 (7), 643-51 (2006).

Zaghloul, A.

Entrainment Properties of Plane Surface-Jets in Shallow Current — R. E. Baddour, A. Zaghloul, and R. Martinuzzi; 132 (4), 363-70 (2006).

Zakaria, N. A.

Multiple Linear Regression Model for Total Bed Material Load Prediction — S. K. Sinnakaudan, A. Ab Ghani, M. S. S. Ahmad, and N. A. Zakaria; 132 (5), 521-8 (2006).

Zakrajšek, Majda

Case Study: Numerical Simulations of Debris Flow below Stože, Slovenia — Matjaž Četina, Rudi Rajar, Tomaž Hojnik, Majda Zakrajšek, Mario Krzyk, and Matjaž Mikoš; 132 (2), 121-30 (2006).

Zanke, U.

Discussion of "Efficient Algorithm for Computing Einstein Integrals" by Junke Guo and Pierre Y. Julien — A. Roland and U. Zanke; 132 (3), 334-6 (2006).

Zaramella, Mattia

Effects of Velocity Gradients and Secondary Flow on the Dispersion of Solutes in a Meandering Channel — Andrea Marion and Mattia Zaramella; 132 (12), 1295-302 (2006).

Zarrati, A. R.

Reduction of Local Scour in the Vicinity of Bridge Pier Groups Using Collars and Riprap — A. R. Zarrati, M. Nazariha, and M. B. Mashahir; 132 (2), 154-62 (2006).

Zech, Y.

Flow in Compound Channel with Abrupt Floodplain Contraction — S. Proust, N. Rivière, D. Bousmar, A. Paquier, Y. Zech, and R. Morel; 132 (9), 958-70 (2006).

Zedler, Emily A.

Sediment Transport over Ripples in Oscillatory Flow — Emily A. Zedler and Robert L. Street; 132 (2), 180-93 (2006).

Zee, Chong-Hung

Earthquake Hydrodynamic Pressure on Dams — Chong-Hung Zee and Raymond Zee; 132 (11), 1128-33 (2006).

Zee, Raymond

Earthquake Hydrodynamic Pressure on Dams — Chong-Hung Zee and Raymond Zee; 132 (11), 1128-33 (2006).

Zhai, Chao

3D Simulation of Combining Flows in 90° Rectangular Closed Conduits — A. S. Ramamurthy, Junying Qu, and Chao Zhai; 132 (2), 214-8 (2006).

Zhao, Can-Hua

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Experimental Study of Surcharged Flow at Combining Sewer Junctions — Can-Hua Zhao, David Z. Zhu, and Nallamuthu Rajaratnam; 132 (12), 1259-71 (2006).

Zhou, Qin

Case Study of an S-Shaped Spillway Using Physical and Numerical Models — Mao Ye, Chao Wu, Yunliang Chen, and Qin Zhou; 132 (9), 892-8 (2006).

Zhu, David Z.

Experimental Study of Flow in a Vortex Drop Shaft — Can-Hua Zhao, David Z. Zhu, Shuang-Ke Sun, and Zhi-Ping Liu; 132 (1), 61-8 (2006).

Mean Flow and Turbulence Structure in Vertical Slot Fishways — Minnan Liu, Nallamuthu Rajaratnam, and David Z. Zhu; 132 (8), 765-77 (2006).

Experimental Study of Surcharged Flow at Combining Sewer Junctions — Can-Hua Zhao, David Z. Zhu, and Nallamuthu Rajaratnam; 132 (12), 1259-71 (2006).
